

**Cornice Nr. 105 “Medium Drip”
(Georgian in Style)**

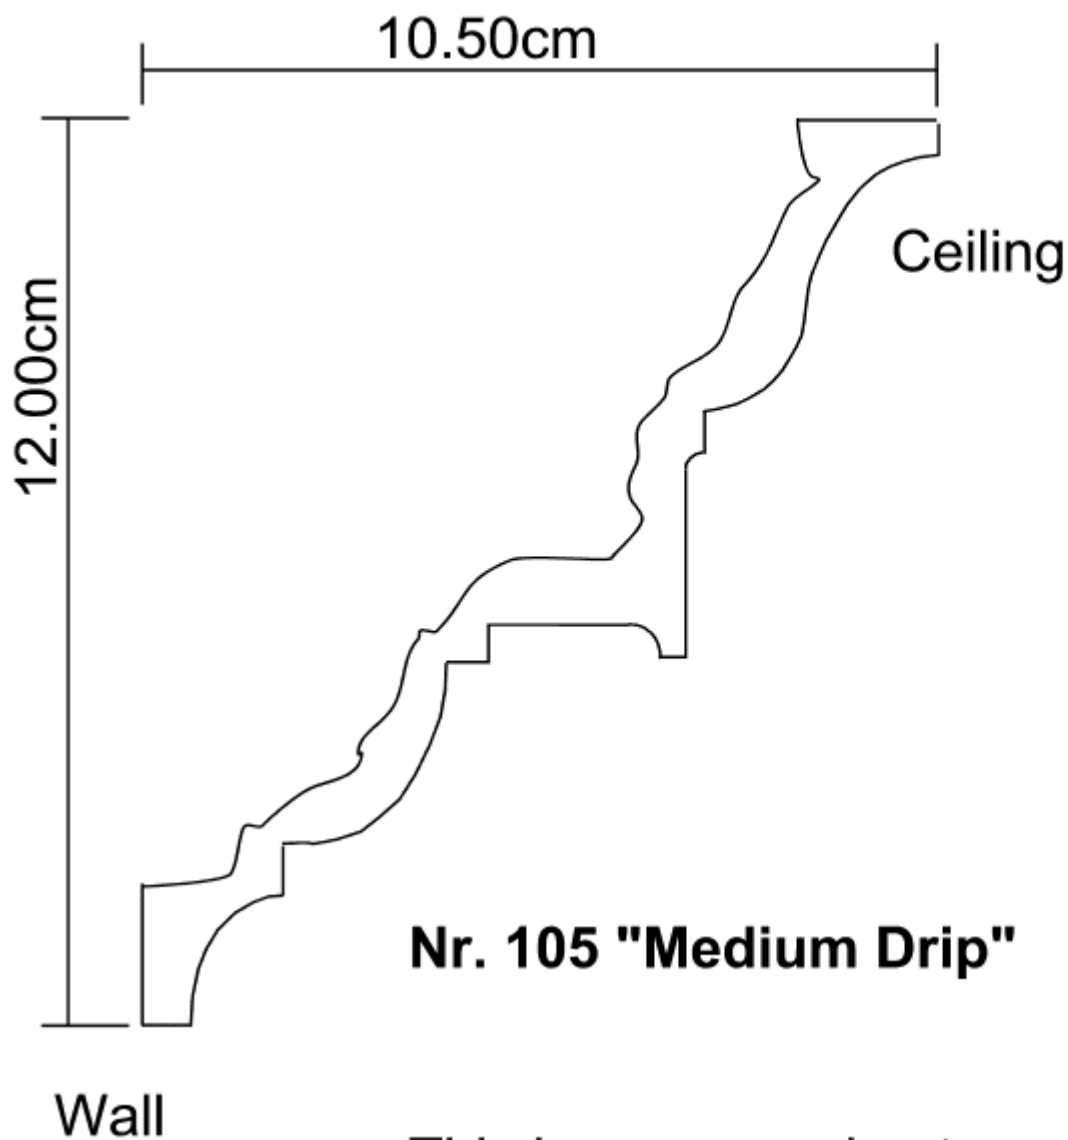

Another “average sized” cornice design from Ossett Mouldings Limited. Nice proportions, good design that we have been producing for very many years now.

All this is apparent from studying the full size Cross sectional sketch on page two of this very document.

This pattern can be used in areas with fairly low ceilings, probably those that are relatively simple on plan. With so many members (much detail) on this section it is possibly best avoided as a “DIY” project - especially for the inexperienced.

**Projection 110mm. (c.5”)
Depth 120mm. (c.5”)
Length of Cast 3250mm. (10’8”)
Plain Run (Drip) Profile**

This is an approximate cross section of this cornice design - when printed out to A4 size.

Sample cornice is on show / available for inspection at our premises near to Dewsbury, Yorkshire. It is permanently fixed into position behind the showroom counter.
