

Cornice Nr. 106 “Victorian”

(Victorian in Style)

Another super, popular cornice. This has also been in production for many years now. Prior to 1984 in my certain recall.

This profile can be and often has been formed onto a curved wall where it looks rather good. For some reason this design is fitted onto pelmet boards, either our specially made cast reinforced plaster items or timber boards by client or other company.

This pattern is just above “average sized”, can therefore be fitted into a “higher” ceiling. While Victorian in appearance it is nevertheless often fitted in newer or modern homes.

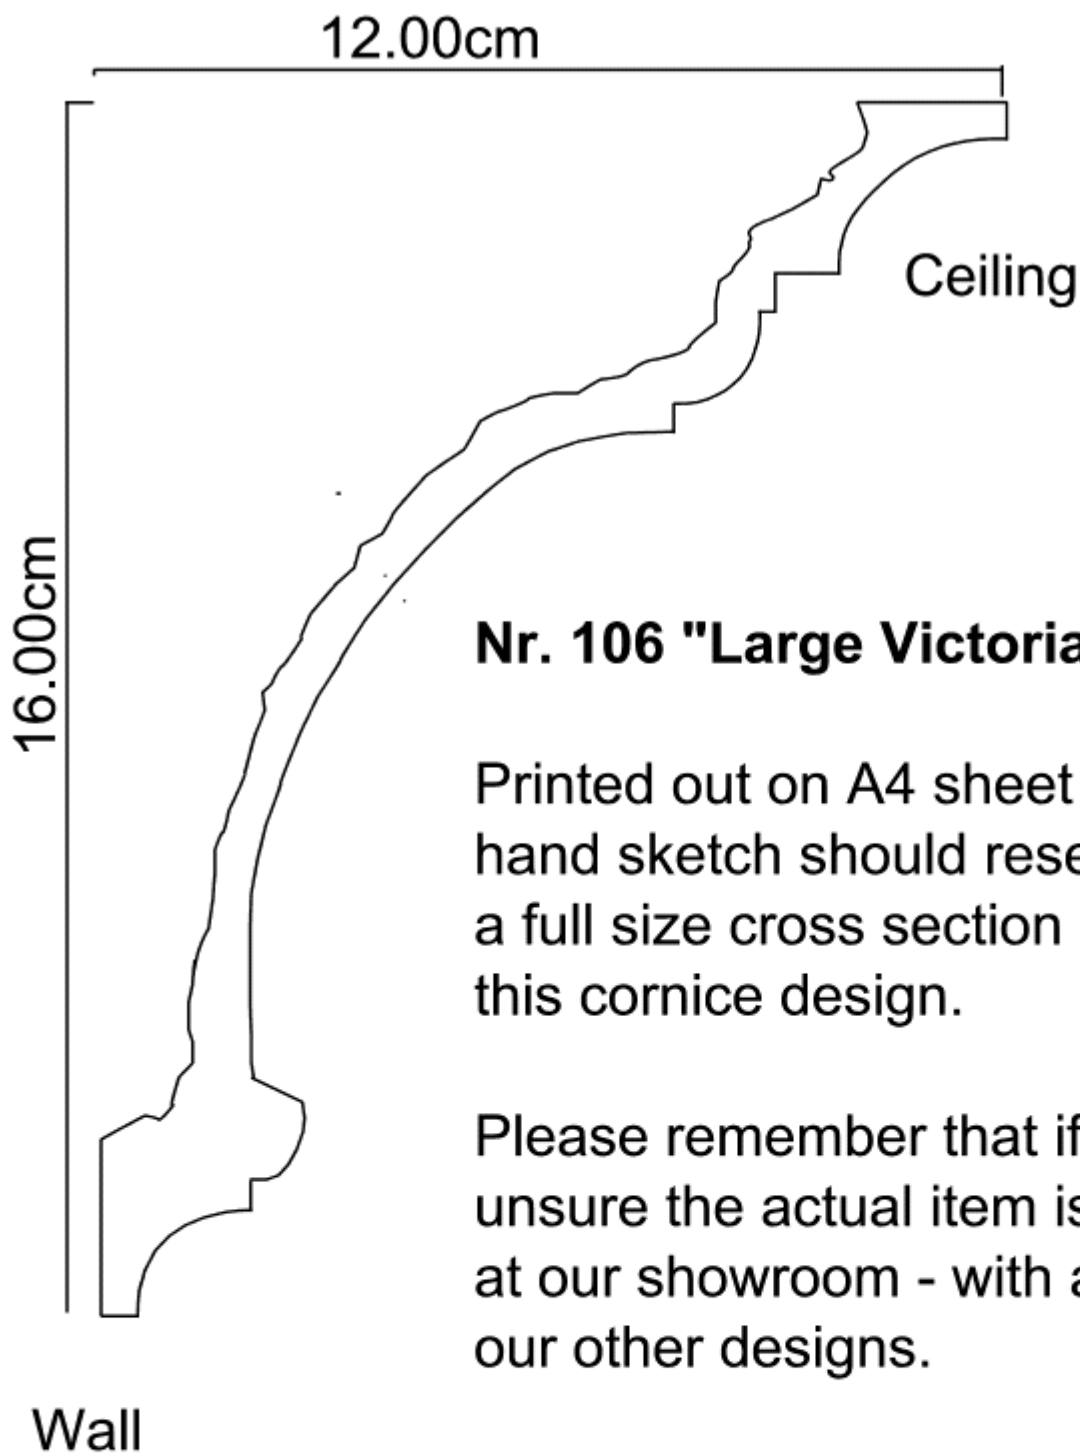

Please use “back” button above to return to main page.

PROJECTION 120MM. (C.5”)

DEPTH 160MM. (C.6.5”)

LENGTH OF CAST 3300MM. (10’ 10”)

PLAIN RUN PROFILE

Nr. 106 "Large Victorian"

Printed out on A4 sheet this free hand sketch should resemble (only) a full size cross section profile of this cornice design.

Please remember that if you're still unsure the actual item is on display at our showroom - with almost all our other designs.
