

**Cornice Nr. 107 “Honeysuckle”
 (“Regency” Style)**

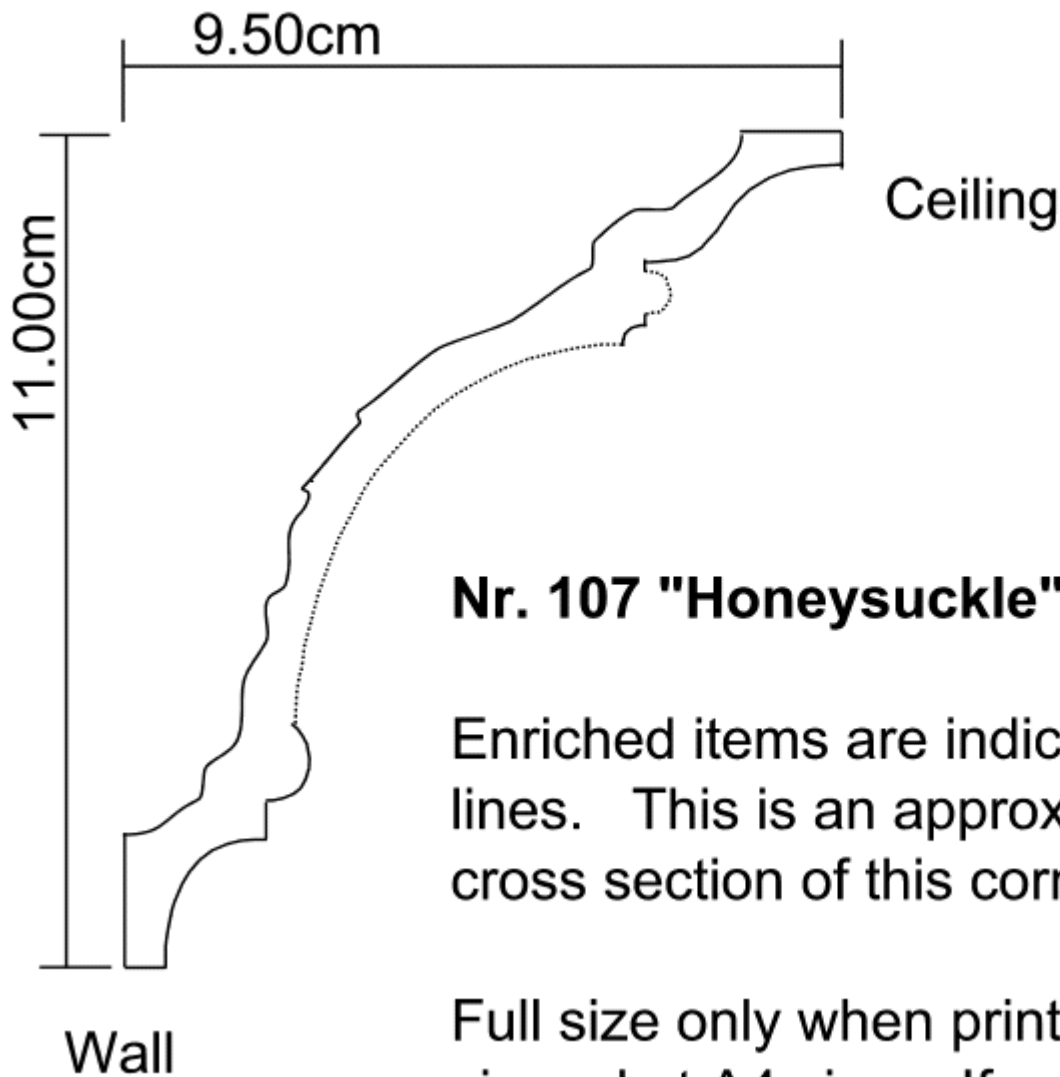

A good cornice, a nice cornice -certainly one of my favourite designs. In addition to the larger Honeysuckle” (Anthemion) lower leaf pattern we also have the upper bead moulding.

If you want a description, this cornice is certainly “average sized”, perhaps even a little above that. For details of the actual cross section please see page two of this document where we have an approximate full size sketch.

This pattern can be used in a variety of properties, it is genuinely versatile.

Projection 95mm. (c.4”)
Depth 110mm. (c.4.5”)
Length of Cast 3350mm. (11’0”)
Anthemion Enriched Profile

Nr. 107 "Honeysuckle"

Enriched items are indicated by dotted lines. This is an approximate full size cross section of this cornice design.

Full size only when printed out or viewed at A4 size. If you want to view the actual item please do call at our showroom / office / workshop premises at Shaw Cross near Dewsbury where we will be pleased to show you this or any other of our many designs.
