

## **Cornice Nr. 111 “Egg & Dart Drip” (Georgian in Style)**

About as “Georgian” as one could imagine, this is of that period in profile and enrichment.

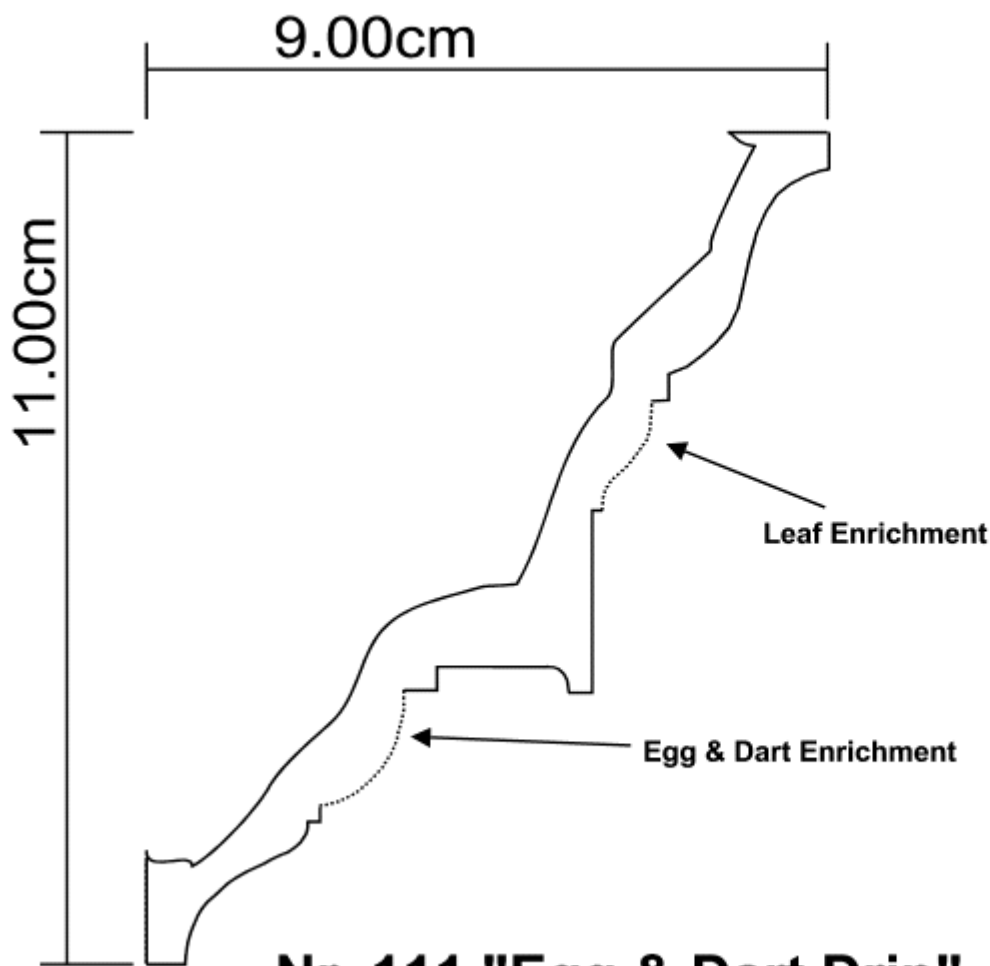

Another of our many egg and dart enriched cornice Designs, this also “average sized”. Consider this for Areas with low or medium height ceilings.

Despite the truly historical root of the egg and dart Design, one can nevertheless install this particular Pattern into newer and older premises and properties.

There is a full size cross section drawing on page two Of this document. While it is in some ways merely Approximate it remains very helpful in selection of Mouldings.

This is also at the “easier end” of cornice installation for “diy” people.

**Projection 90mm. (c.4”)**  
**Depth 110mm. (c.4.5”)**  
**Length of Cast 3270mm. (10’8”)**  
**Enriched, Drip Section Profile**

### **Nr. 111 "Egg & Dart Drip"**

Full size (approx.) at A4 size. A short installed sample is on display at our Dewsbury showroom.

This is grouped together with several other egg & dart patterns for direct comparison with each other.
