

Cornice Nr. 120 “Rialto”

(Modern in Style)

An “average sized” cornice moulding, this is a medium sized cove cornice with two rilles incised into the face to “modernise” this very contemporary design.

Quite an unusual feature to include on any cornice design, I believe this pattern is absolutely unique - exclusive to Ossett Mouldings Ltd. As are many other / most of our designs - you won't get them any where else!

This could easily be contemplated for “self installation”, but please first consider our DIY page elsewhere on this website.

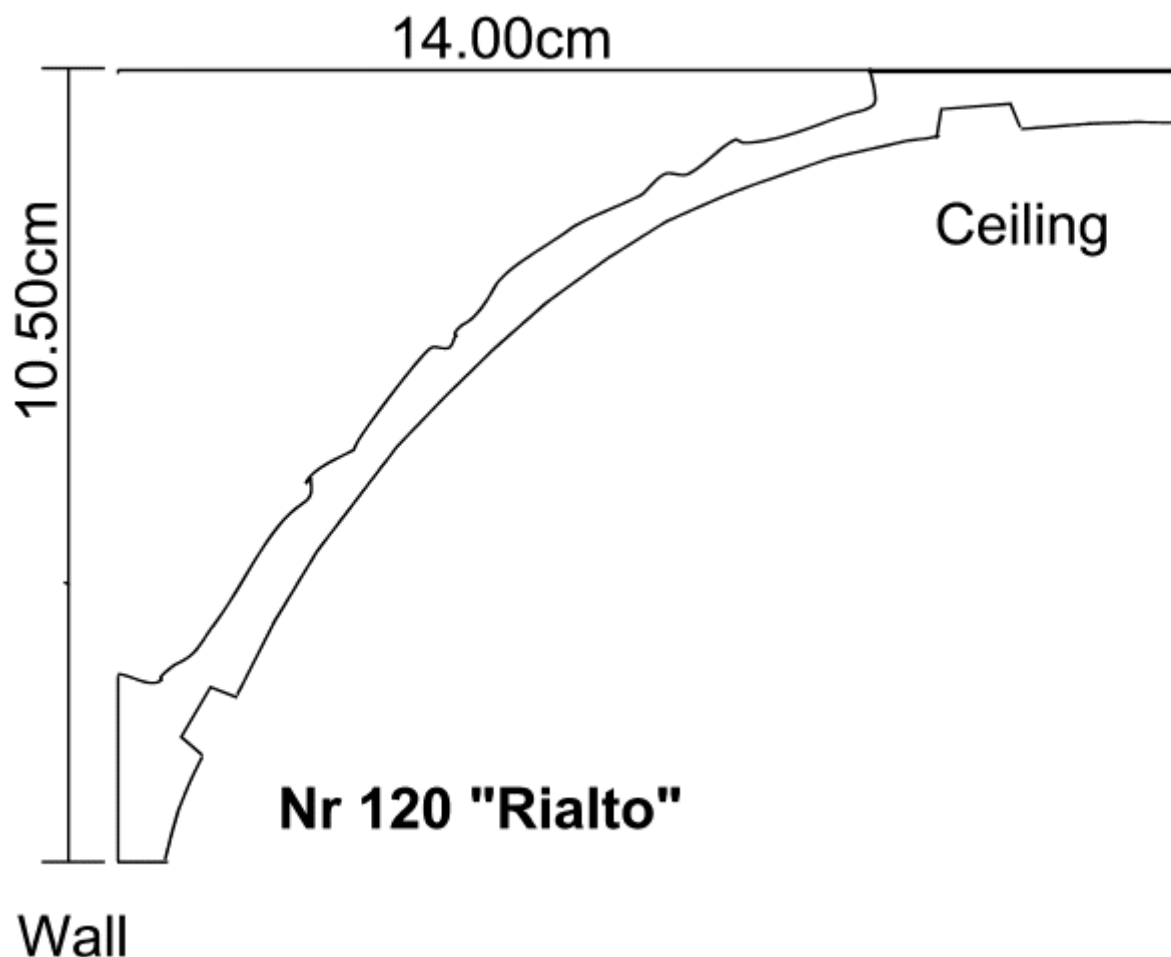

This has been fixed in large areas in international hotel chains, also in otherwise “minimalist” large domestic areas.

Projection 140mm. (c.4.5”)

Depth 105mm. (c.4”)

Length of Cast 3450mm. (11'4”)

Plain Run Section

This cornice can be inverted (turned other way up) if you wish, but I believe it looks best this way up.

Print this sheet out to A4 size and it should be a full size cross section of this cornice.

The incised rilles are in fact, a little smaller than shown here, but please do inspect the real thing on show at our Dewsbury premises for yourself - in person!
