

Cornice Nr. 122 “Bathroom”

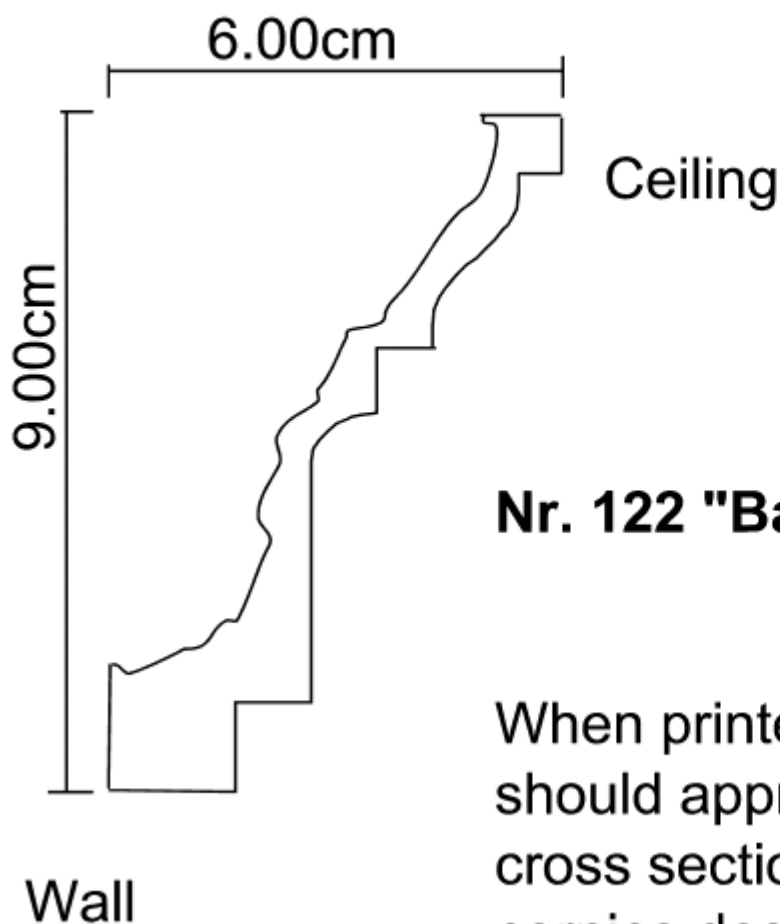

A fairly small cornice profile this. For your reference and info. the full size cross section is on page two of this document.

Note that on this section the bottom most edge is more thick Than any other patterns in our large range. This is to suit / accommodate a tile or marble thickness directly below. When stone or ceramic is fitted the cornice will then acquire a more “normal” bottom edge.

This additional thickness can be cast on / applied to almost any of our other designs. We will have to charge extra for this additional work - sorry!

Back to cornice catalogue page - please use above back button.

Projection 60mm. (c.2.5”)
Depth 90mm. (c.3.5”)
Length of Cast 3500mm. (11’5”)
Plain Run Section

Nr. 122 "Bathroom"

When printed out at A4 this sheet should approximate to a full size cross section of this particular cornice design.

As with almost all our other designs, actual examples of this cornice can be inspected by hand and eye in our Yorkshire showroom.
