

**Cornice Nr. 125 “Marne”
(Victorian in Style)**

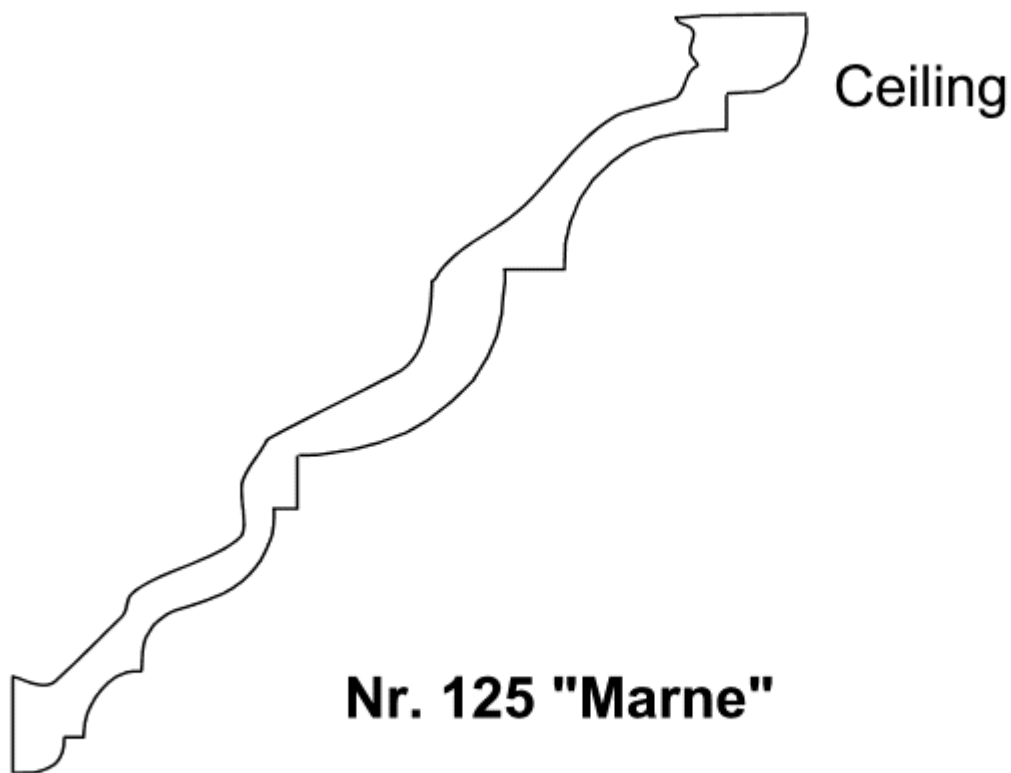

Yet another good, large plain cornice design. One that has a lot of “bulk” or, if you prefer “volume”.

Again, use this in large rooms, particularly in areas With high ceilings.

This is another design that is truly Victorian, but please note - not “European Victorian”, this is actually a design from the turn of the 18th. / 19th. Centuries, small town North America.

A half full size cross sectional profile is on page two of This very document. Please also consult this item.

Projection 205mm. (c.8”)
Depth 200mm. (c.8”)
Length of Cast 3000mm. (10’0”)
Plain Run Section

Nr. 125 "Marne"

Wall

This is approximately half full size at A4 size, therefore it could possibly display approx. full size at A3 format.

I cannot get this program to dimension, except when at full size, therefore please note this design has the projection from wall of 205mm. and 200mm. depth down the wall.

We have a section of this on display at our workplace, fixed quite high up. Please ask to view it if you want to be sure of the profile.
