

Cornice Nr. 128 “Schumann Ogee”

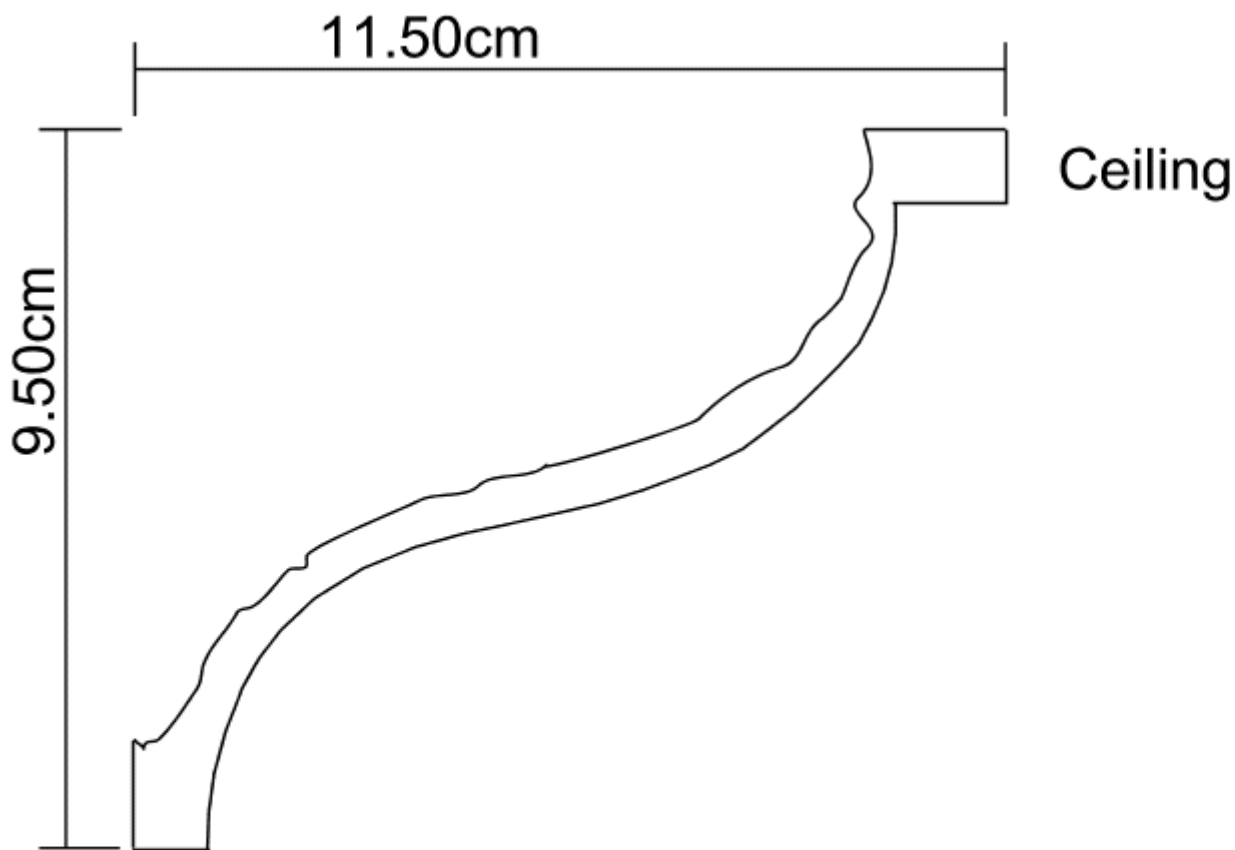

Clean, simple and modern, this particular pattern was originally designed in the then West Germany for a large Hilton Hotel contract. This cornice was installed in the “Schumann Room” - Schumann being a native of North Rhineland where the job/ Dusseldorf is located.

Another “average sized” model, consider using this one in areas with low to medium height ceilings. I believe this design will especially suit a complex ceiling plan, that is to say one with many mitres.

As is customary in this section, an approximate full size cross section of the cornice profile appears on page two of this actual document.

Projection 115mm. (c.4.5”)
Depth 95mm. (c.4”)
Length of Cast 3450mm. (11’3”)
Plain Run Section

Wall

Nr. 128 "Schumann Ogee"

Also approximately full size when viewed at A4 size.

Please ask to view physical examples of this item in our Yorkshire showroom near Dewsbury. We will be pleased to show you this item, also many alternatives.
