

## Cornice Nr. 133 “Blandford”

An unusual, but potentially very useful profile in particular situations, having at 65mm. very little projection from the wall while it is actually very deep down the wall from the ceiling at 200mm.

Also has a fine, tight fluted enrichment and quite good looks.

This was originally designed many years ago for a five star hotel in Yorkshire and for some reason this has appeared in several “Pizza Hut” restaurants.

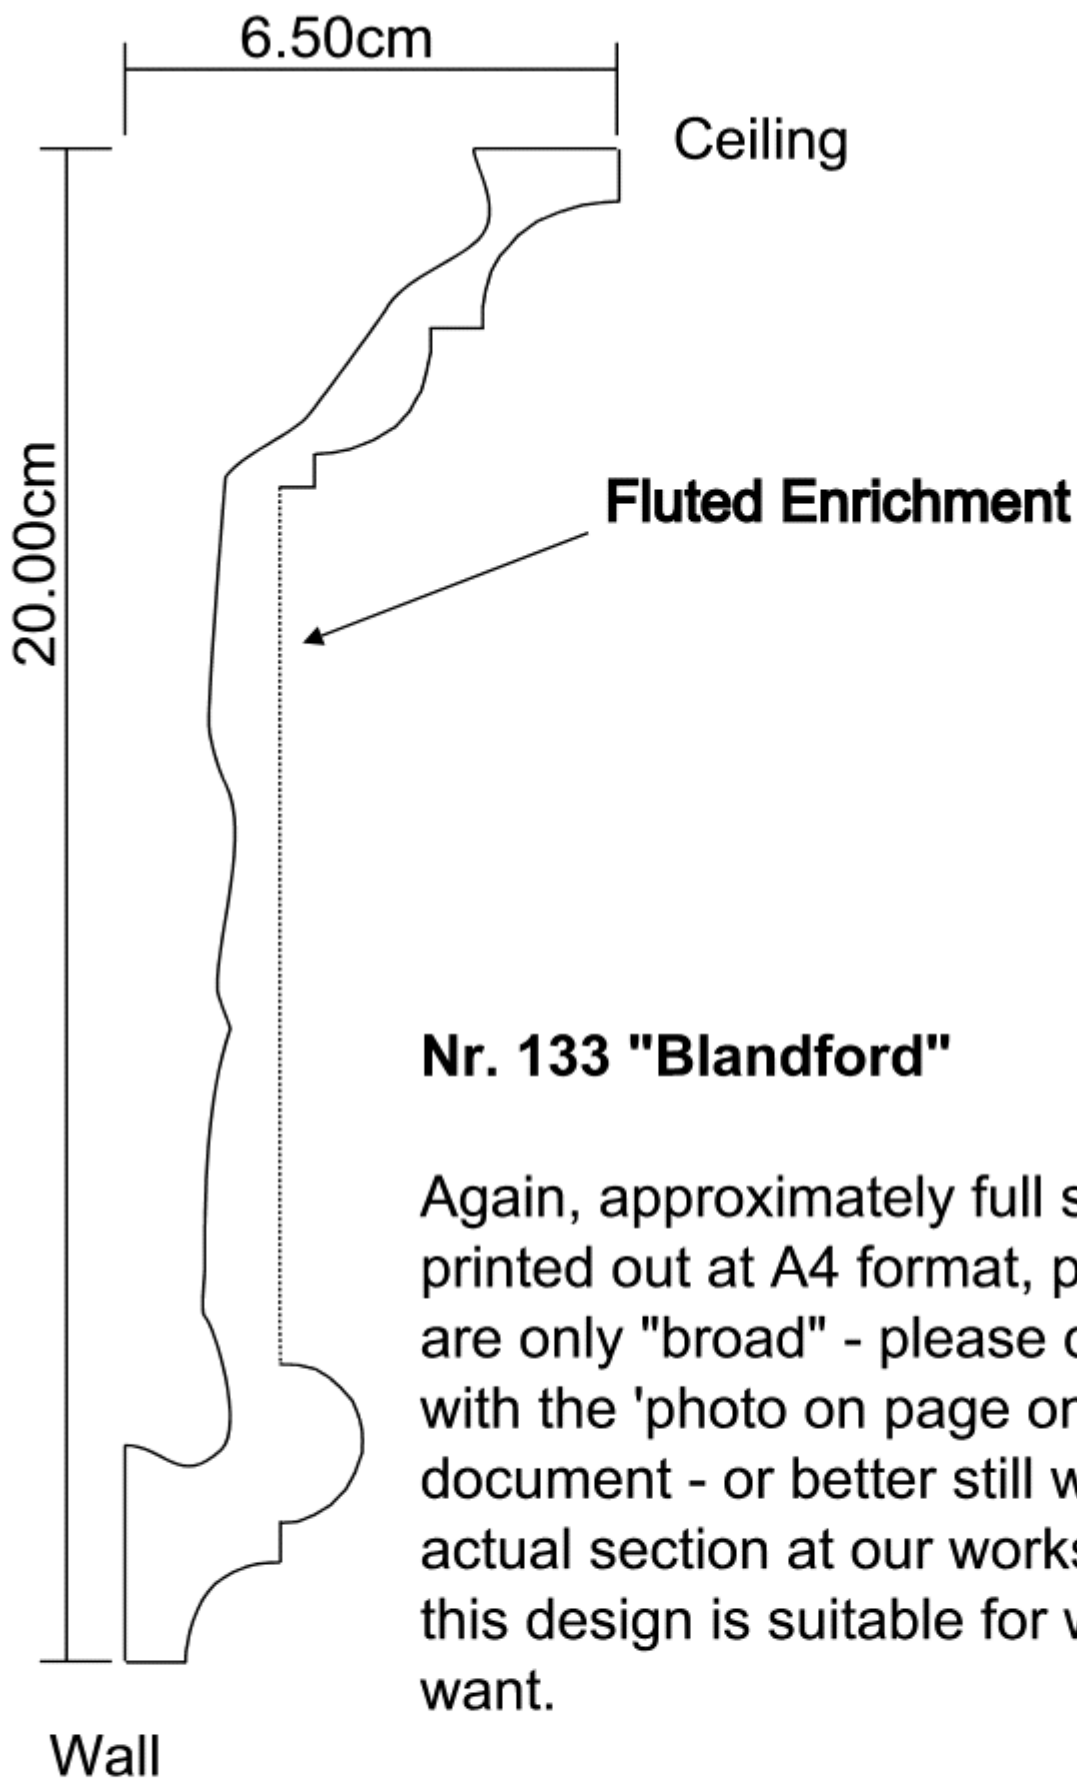

Anyhow, please have a look at the full size cross section on page two and see if you feel it might have A similarly useful application for you.

**Projection 65mm. (c.2.5”)**

**Depth 200mm. (c.8”)**

**Length of Cast 3200mm. (10’6”)**

**Flute Enriched Section**

### **Nr. 133 "Blandford"**

Again, approximately full size when printed out at A4 format, proportions are only "broad" - please do check with the 'photo on page one of this document - or better still with the actual section at our works that this design is suitable for what you want.
