

## **Cornice Nr. 134 “Albert” (Victorian in Style)**

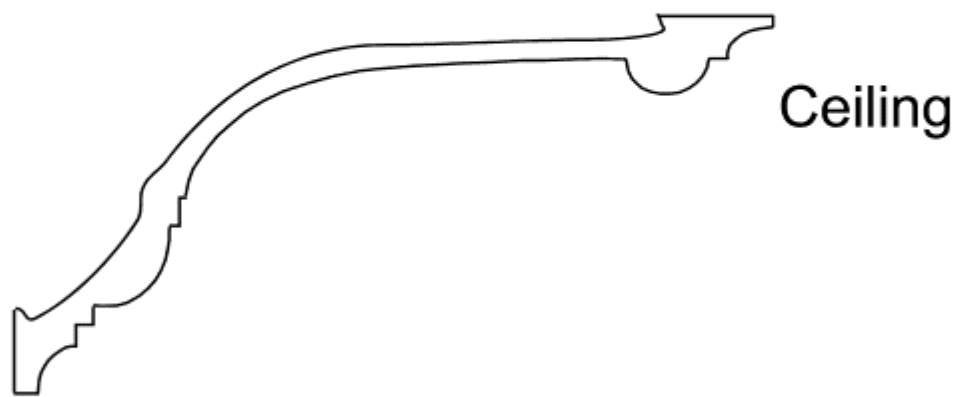

A reasonably large cornice design, one with the entirely Victorian features of “more” to the ceiling, relatively small depth down the wall and a fairly central cove section.

Please consider using this one in large areas, commercial & domestic, possibly with higher ceiling levels than average.

If this is slightly larger than you require or are “happy” with please consider also our very similar Nr. 151 “Small Albert” cornice design.

A half full size approximation of this cross section appears on page two of this paper.

**Projection 200mm. (c.8”)**  
**Depth 100mm. (c.4”)**  
**Length of Cast 3100mm. (10’1”)**  
**Plain Run Section**

Wall

## **Nr. 134 "Albert"**

This is "about" half full size - at A4 size.

It's approximate for proportions, the sole intent here is to convey the general relationship between these many members (cornice components).

A piece of the "real thing" is installed at our showroom - behind the counter it's the top item.
