

## Cornice Nr. 139 “Hatfield”

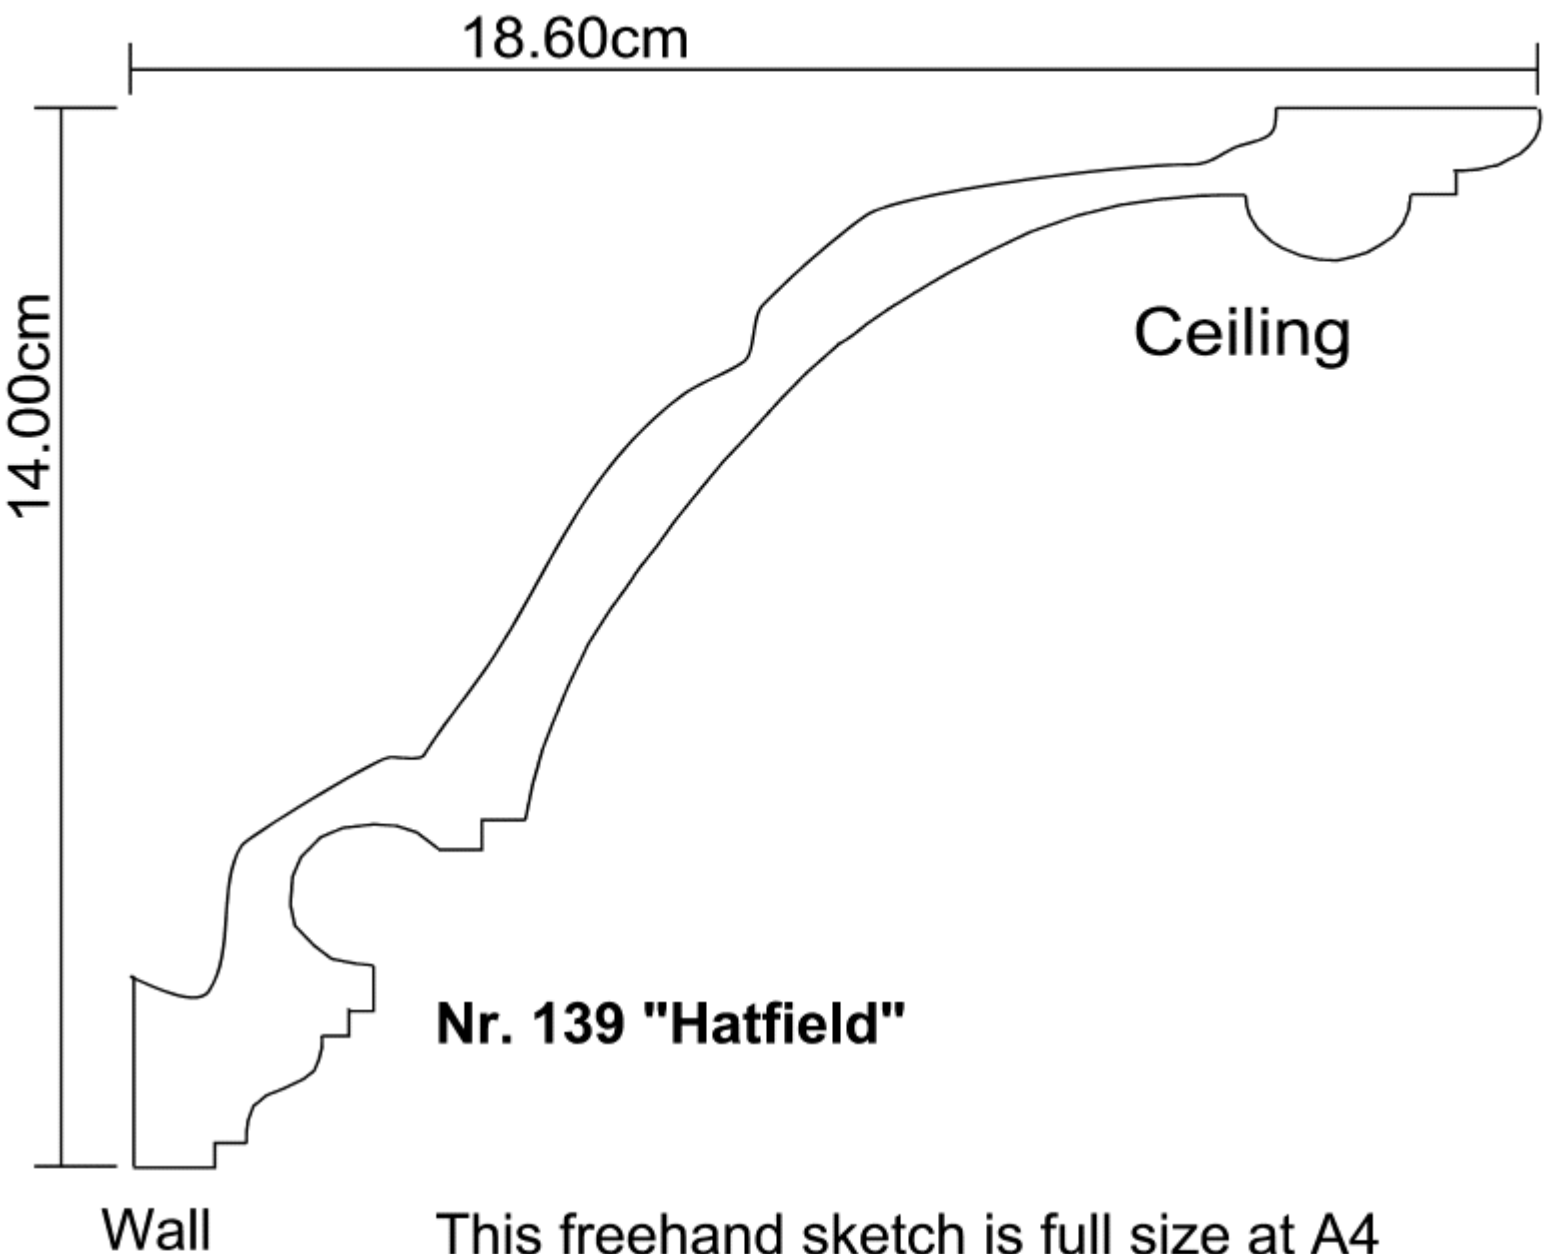

A larger than average cornice. However if you want one similar to this but larger, please do consider the very similar Nr. 140 “Helmond”.

Again, this one is not suitable for installation by the inexperienced or amateur. The cross section on page two will also illustrate the complexity of this design. This makes mitring and jointing difficult.

As with most of our designs, this one is on show at our works, but this one is fixed quite high up.

Possibly Victorian in design.

**Projection 186mm. (c.8.5”)**  
**Depth 140mm. (c.5.5”)**  
**Length of Cast 3200mm. (10’6”)**  
**Plain Run Profile**

**Nr. 139 "Hatfield"**

This freehand sketch is full size at A4 format.

We have a piece of this in our works you can view, but it is fixed up at quite a high level.

***Page two of two***
