

**Cornice Nr. 143 “Dentil”  
(Georgian in Style)**

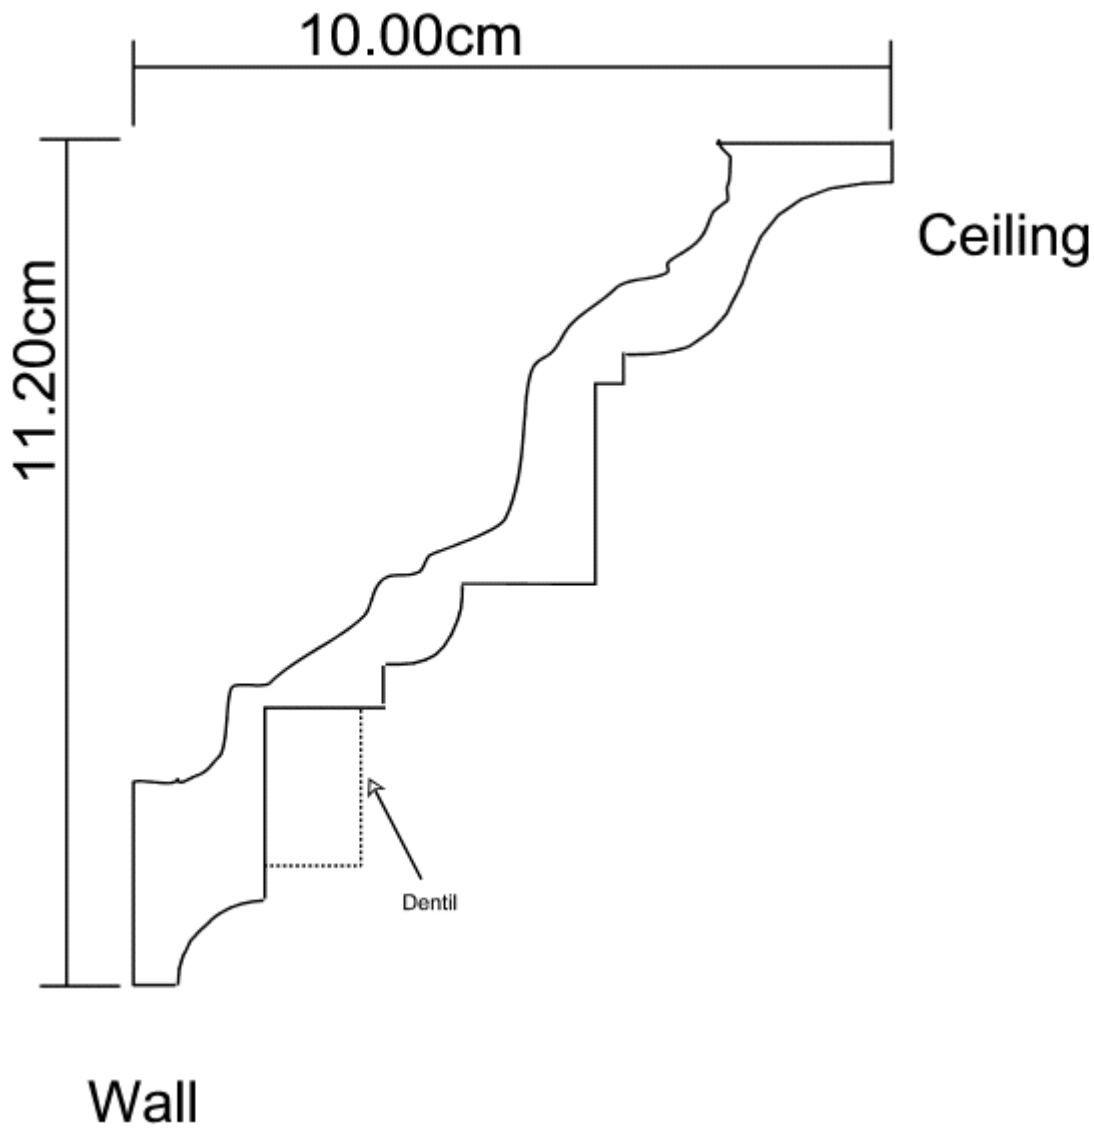

Apologies for this poor illustration, we hope to replace this soon - when we install some more.

Again, another “medium sized” cornice design, it is best suited for low to medium height ceilings with simple or complex ceiling plans. In truth this will suit complex areas very well indeed.

Please note from the cross section on page two the solid, chunky appearance of this profile. It will be possible for the patient “diy er” to install this design, but I strongly advise they first consult our lengthy DIY page first, also that they raise any questions that arise with our office.

**Projection 100mm. (c.4”)**  
**Depth 112mm. (c.4.5”)**  
**Length of Cast 3050mm. (10’0”)**  
**Dentil Enriched Profile**

### **Nr. 143 "Medium Dentil"**

At A4 size, this freehand sketch should give a reasonable idea of this cornice proportions.

To see the actual cornice moulding, please do call at our premises to inspect the actual item first hand.
