

Cornice Nr. 146 “Scarborough”

So named because this design was originally specially made for a world famous resident of Scarborough whose home we worked for a number of weeks.

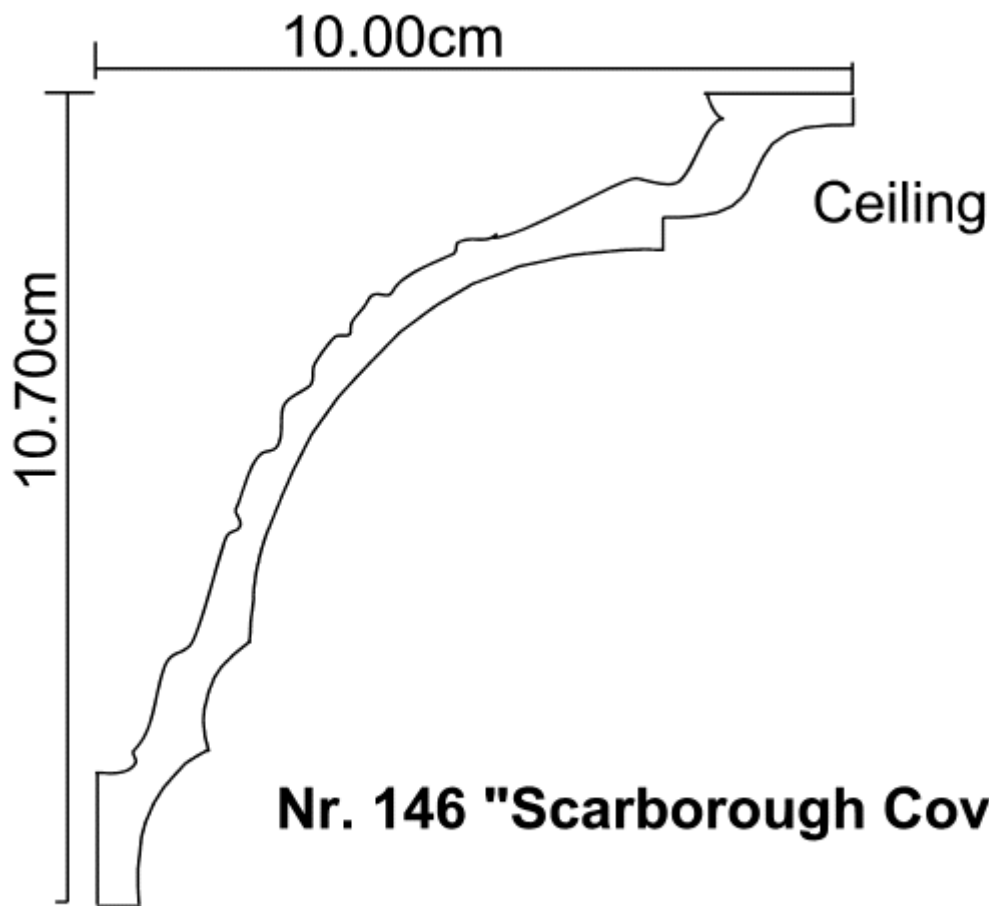

It is an “average sized” cornice design, can be fitted into fairly small areas, possibly with complex ceiling plans.

This design, while broadly Victorian in profile is nevertheless truthfully modern and clean in profile (see cross section on page two of this document). Can therefore be installed into new / modern premises.

Simple enough to consider for DIY installation - please see the DIY page on this site.
