

Cornice Nr. 163 “Royal Tom”

(Victorian in style)

A very new cornice design, we began production of this cornice Only in late 2006, but this design is also from the century before last, being a very careful reproduction of what existed in some apartments in York City Centre prior to their conversion from A well known hardware store during 2006.

As one can see from the dimensions below, this pattern is well Above “average size”, will therefore be very suitable for large Rooms and certainly areas with high ceilings.

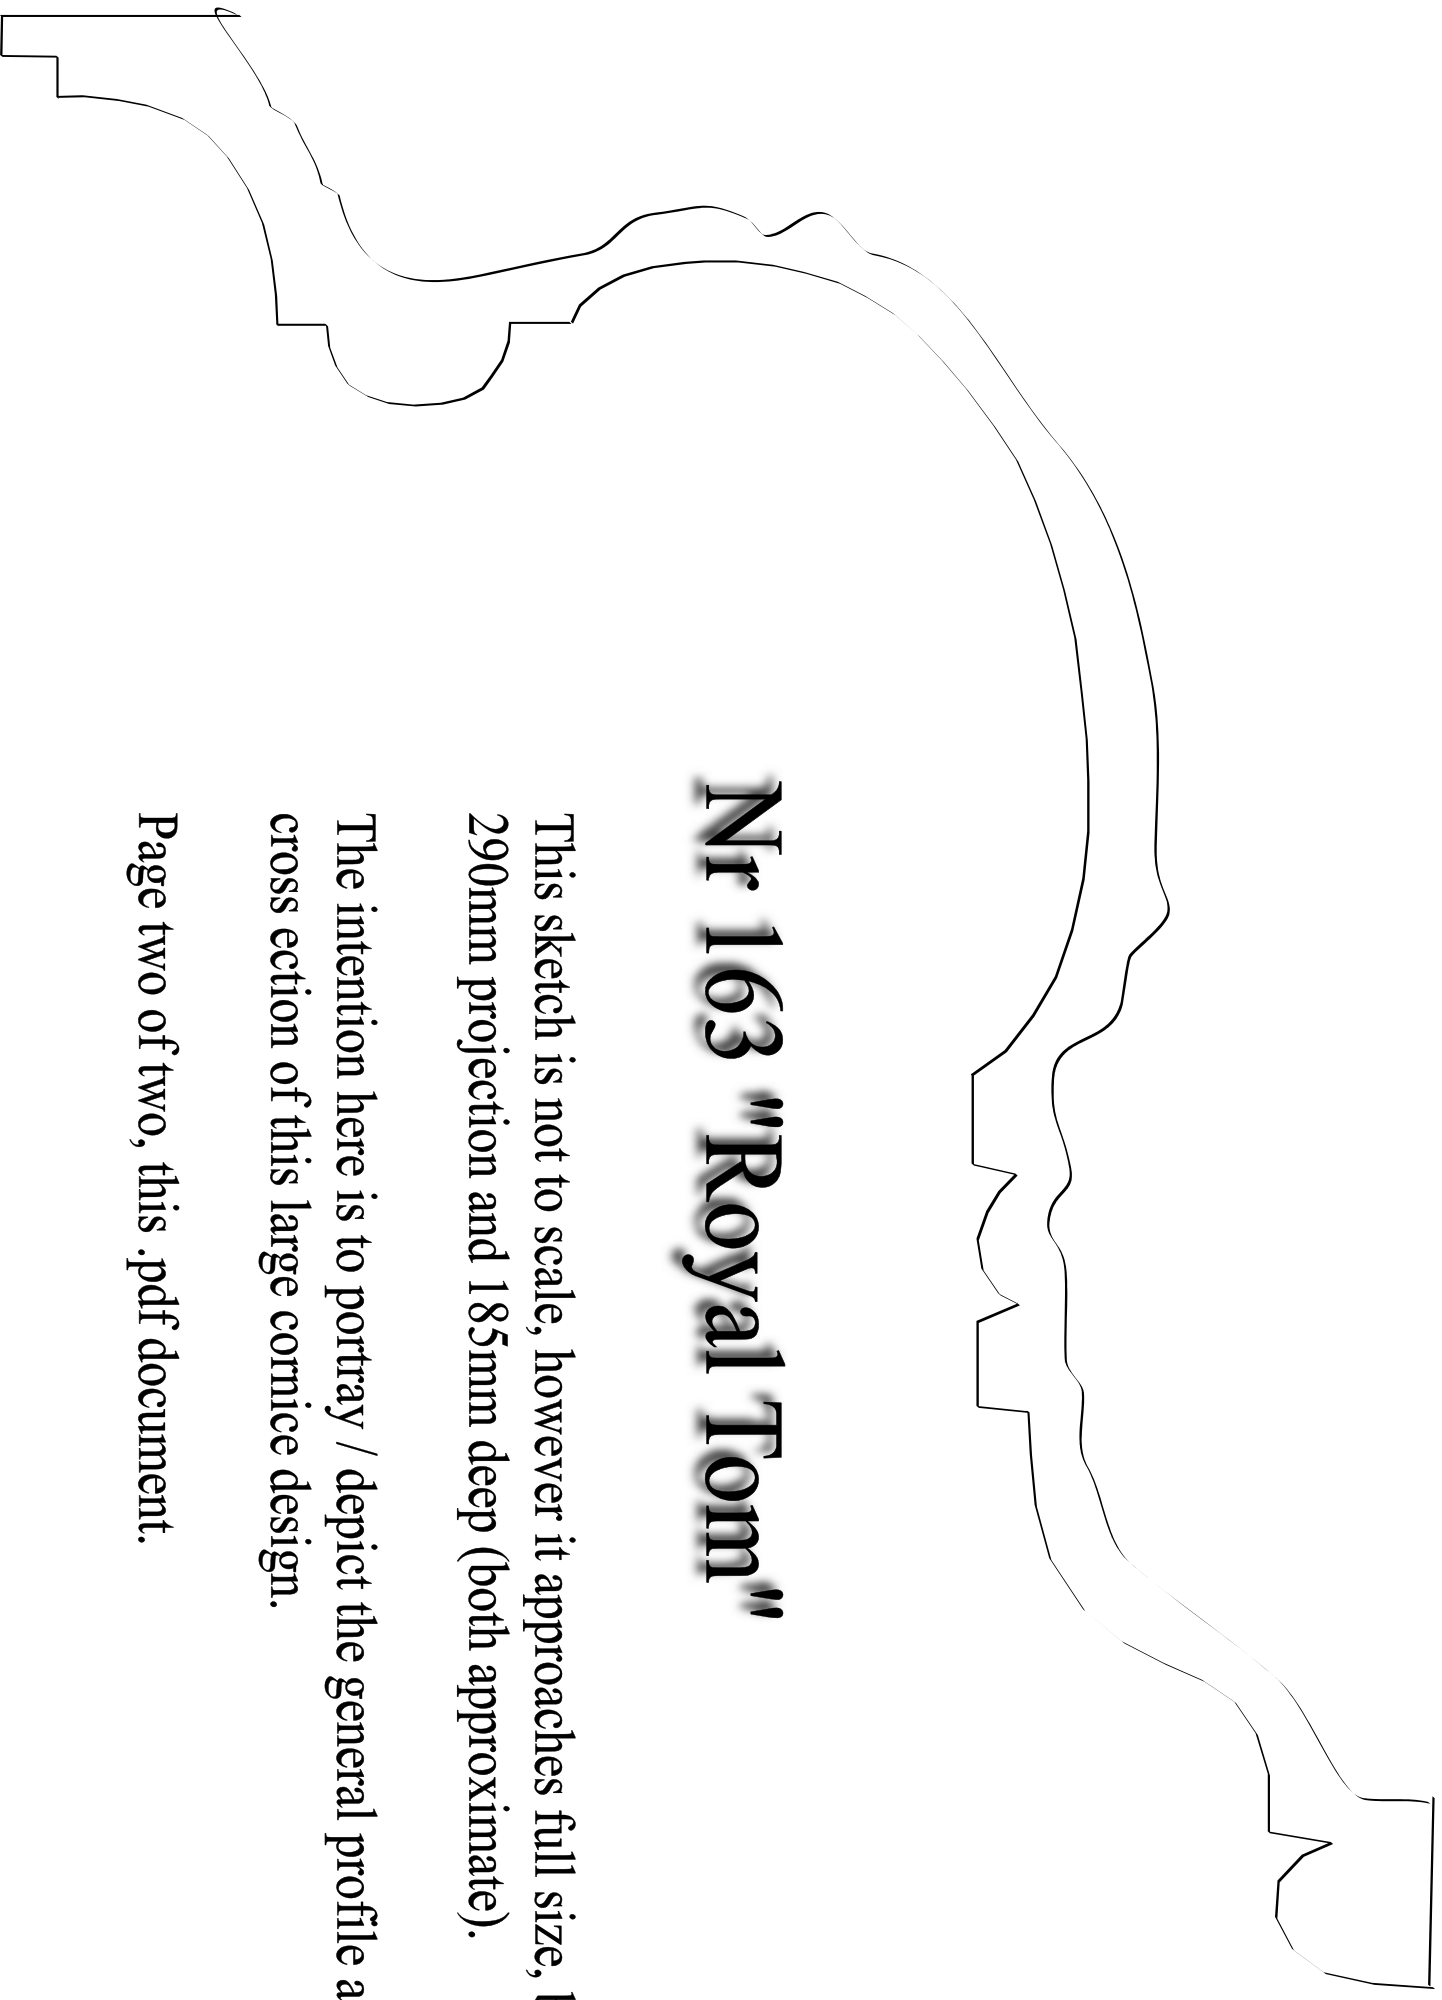

Apologies for the absence of an actual cross section on page Two of this document.

Projection 320 mm (c.8”) - approx.

Depth 160mm (c.6.5”) - approx

Length of Cast 3500mm (11’6”) - approx

Plain Run Profile

Nr 163 "Royal Tom"

This sketch is not to scale, however it approaches full size, being 290mm projection and 185mm deep (both approximate).

The intention here is to portray / depict the general profile and cross section of this large cornice design.

Page two of two, this .pdf document.
